PONOKA.

Bulletin News Service.
More than 100 people are arriving. The western districts apparently are claiming the largest percentage of the new settlers.

The arrival of an expert from Winnipeg this week.

F. Angeloff, Jr., 21, is at present holding meetings nightly. He is associated with the Muses Club, vocalists.

G. J. McEachern, president of the Agricultural Society, represented the association at the Agricultural convention held in Brandon, Manitoba, last week. The fair here are the same as last year. October 7 and 8.

Mr. and Mrs. Jim Jones, who left home six months ago for H.C., have returned. Mr. Jones is looking for a business opportunity.

A large number of farmers interested in the new land have not far to go. On Saturday afternoon and decided to take legal steps in order to have their sole rights to the land. That means, if they have a claim, it will be upheld. This has somewhat of a learning question amongst the farmers for some time.

Much has been done, but the quantity of grading was done, now that the snow is melting, a large pool of water has formed in the valley. It is expected to be undertaken right away. The western district will claim attention.

The local creameries are making arrangements to have the new land put into the first of three. There are three installations in this neighborhood, and the coming year, more will have to be reckoned with. A number of auction sales have taken place in the neighborhood, and the farmers are getting their surplus stock in order to be better able to go in for dairying. Every thing is going to a great year for the economy.

BEAUTIFUL COUNTESS WAS ONLY A ROGUE

ONTARIO GERRYMANDER.
Representation.

Toronto, March 24.—Toronto constituents are as anxious as ever, with the redistribution bill provides, two members each. Such a result, the Whitby Government, subject to the Legislature, which will be made when the bill comes up in the House. Nearly the whole plan of the redistribution has been agreed upon by the special committees of the legislature. Twenty-five ridings will not affect the constituency boundaries, while the present intentions hold good. These were announced this morning by the Minister of Municipal Affairs, North Bruce, East Elgin, West Elgin, Haldimand, East Lambton, West Lambton, Bruce, North Peel, Perth, East Simcoe, and the two Toronto ridings, each of which contains one of the counties, stretching from the southern border of the province to the northern limit of the province.

Her great art now reveals her not as a captivating, brilliant beauty but as a thievish, unscrupulous intriguer, a woman concealed in her bewitching garments an array of burglar's implements. In her hands she holds a picklock, open to her own hotel room, the curtains which she had drawn in the Riviera, which she had valuated at over one thousand dollars.

Four new constituencies have been created in New Ontario. There are Fort Francis and Kenora, which have been formed from portions of the former ridings of Sudbury and Temiskaming, the latter the western district of Ontario, are Kenora, Fort Francis, and Sudbury and Temiskaming, which comprise a district corresponding to East and West Nipissing.

The New Ontario constituencies, according to the plan, will be as follows:

Kenora, Sudbury, and Temiskaming.

Eleven constituencies are to be created in the eastern part of Ontario, including the western districts of Peterborough, Algonquin, and Muskoka, and the two ridings of East and West Nipissing, which were seven.

The ridings of Algoma, Manitoulin,

and Sault Ste. Marie, and the two ridings of East and West Nipissing are, by reason of greater increased population, considerably reduced in size.

GERMANY'S ATTITUDE.

In World Politics is Peaceful, Says Von Bielen.

Berlin, March 24.—Chancellor von Bielen delivered a notable address in the Reichstag to-day, dwelling upon the Tzschirnau affair and voicing the friendly and peaceful intentions of Germany towards the world politics. Referring to the Tzschirnau affair, the Chancellor declared that the Alsace was binding upon all signatures of the League of Nations, and that, up to the present time, of approaching Germany with a narrow interpretation of the League, it was not the intention of Germany to change its views, but, in return, to give an opportunity to the world to put out the terms of the Act in a peaceful and friendly manner. Referring to the Tzschirnau affair, von Bielen said the efforts of Von Buelow and the efforts of the German government to bring about a final battle against the forces of the Entente, he said, "had been thrown through on the tire continually from our side, and the result of this was not to do us the service between Christendom and Mohammedanism; but in little struggle among the various Christian confessions."

In his speech he claimed that a banner stretched across the street proclaimed the alleged fact that 40,000 Moslems

in Spokane the number of most models, it is believed, according to the latest news, that this city was planning for 5,000. In other cities the figures varied.

There is a very terrible tide of unemployed men flowing into Butte, and the miners are rapidly becoming a very populous class. Every train bringing in men in quest of work. There is no room for them, and more than the mines can possibly take care of, even when they are running full, especially when the mines are closing off before the mines are operating full forces. As the result of the influx of unemployed men, the charity kind of the city are being crowded with strangers.

Business Changes.

Winning, Mar. 24.—W. Johnstone, who has from its inception been managing director of Greenleaf Industries, Ltd., Winnipeg, has severed his connection with that company and along with his brother, A. J. Johnstone, has established a new business, the stock in trade of Greenleaf & Co. Ltd., Vancouver. The transaction is to take place on April 1, 1908.

The deal approximates \$300,000. It is the intention of the brothers to organize a new stock company in British Columbia and to carry on the present wireless dry goods business there. They will also, at an early date, open a warehouse in Vancouver. A. M. Johnstone, the present manager of the office of Greenleaf & Co. Ltd., Vancouver, Mr. A. W. Johnstone is undecided at this writing, but it is felt he will remove to Vancouver or not.

Bank of Montreal Expanding.

Winnipeg, Mar. 24.—The manager of the Canadian branch of the Bank of Montreal is about to inaugurate a more expansive policy, as they will open a branch in the United States and very likely on the continent of Europe, with a view to acquire additional branches in Canada, both the London and Montreal exchanges. The statement is made that within a few months the bank will open a branch in each of the major cities in the United States, and open in all the United States centres where exchange business is done, so that when the present branch of the bank will very soon be opened in San Francisco, the Canadian branch of the Bank of Victoria has already been established.

Saskatoon Bridge Sinks.

Saskatoon, March 24.—The lack of work on the temporary bridge of the Canadian Pacific Railway, which is to last a day on the second span, and as a result it has been decided to remove the temporary bridge and to lay the new track permits. This will make the construction of a permanent bridge more difficult, as the C.P.R. bridge gang should be completed in a month. Meanwhile the C.P.R. train service is interrupted.

Boycott of Japanese Union.

Hong Kong, March 24.—The anti-Japanese boycott caused by the Tatsu Yaku, or Red Guard, who have been posted on the walls bearing these words: "The Japanese are bandits, and the Chinese must establish a national government that does not love people who are not Chinese." The Japanese government does not love people who are not Chinese. They must establish a national government immediately, and their punishment may be expected in a few years."

Former Organizer a Candidate.

Toronto, March 24.—A. W. Wright, president of the Public Ownership League, who is the independent Conservative candidate in West Toronto for the legislature.

IS A STORM BREWING?

A. Pittsburg, Pa., Mar. 24.—An investigation is in progress here which will, it is said, result in the deportation of the Chinese from the city. The Chinese from the Pittsburg district within the next few months.

John H. Moore, agent at large for the immigration bureau of the department of commerce and labor, is investigating the Chinese here, gathered information concerning their intentions to commence deporting them.

While he could not give an estimate as to when they would be deported, he said it would run into the spring.

The crusade is the carrying out of the recent order of federal authorities to expel the Chinese from the country.

There is no question that the Chinese are here to stay, and that they will remain here, but the Chinese themselves are not anxious to remain here, because they know that if they challenge the public court will drive them out.

At any rate, I have openly accused the Chief Secretary of conducting an investigation of the Chinese here, and this accusation before the Speaker of the House of Commons, once called to mind the name of Sir Arthur Viger, who was the author of the Chinese Exclusion Act.

I have often overheard him say that he knew he would be successful in his crusade because he knew that if he challenges the public court will drive them out.

He has also said that he would neglect the danger-signal.

WEDNESDAY, MARCH 25, 1908.

A USEFUL INSTITUTION.

The City Council last week granted \$5,000 to the Board of Trade with which to carry on work during the coming year. This grant will be used with very general application. It is indeed difficult to clearly narrow the work done by the Board and the opportunity now open to it. To detail the work done in figures and words is impracticable and to outline the general scope of the work is equally so. Nor is it necessary. The public are very well apprised both of the work done and of the work which can be done and are quite willing to hear a large share of the same.

A board of trade is a voluntary association of business men primarily associated for the purpose of promoting their own interest. But in working for this end a board may develop along either of two lines. It may represent the general welfare of the members and working for the personal advantage of the members and working for this purpose alone; or it may recognize the broader principle that what makes for the general good makes also for the individual interest. That principle has been heartily recognized by the Edmonton Board, whose working maxim has become the advancement of whatever promises to promote the general welfare of the city. Working on this principle the Board in a multitude of ways has been an agency in the encouragement and inception of means for general betterment. In so doing it has earned the gratitude of the public for services rendered and a confident expectation that the broad principles of the future will be met with an equally public-spirited manner and purpose.

One of the many lines of usefulness of the Edmonton Board has been the conduct of a publicity campaign. For several years some kind of publicity campaign has been conducted and has been recognized as desirable and necessary by towns and cities in the prairie Provinces generally. The means adopted have been different. In Edmonton work has been left to the Board of Trade, and with very satisfactory results. All things considered Edmonton has received a very fair proportion both of the incoming people and of incoming capital. A considerable share of the credit for this is due to the publicity work carried on by the Board.

In one respect in this connection the Board has perhaps not received the full measure of credit due. There are publicity campaigns and publicity campaigns, depending for their effect upon the number of people who attend them. If the purpose is merely to attract unanswering strangers to the city to end that they may be sold property, then the time to "leas" is all the time. But if the purpose is to attract the people who are to live in the population and the opportunity of livelihood, then there are times to boast and times not to boast. When the money market tightened up last summer the Edmonton Board of Trade decided that it was time not to boast about the money market, but rather to boast of literature was suspended, and no effort made to induce people to come to the city until spring. The history of the winter has justified the source. Cases of destitution in this country are not unknown, but when compared to cities where public utility services were not suspended, those cities for the time being, got the people and had to support them. Edm. did not get them and in consequence we had little added to our income for the support of the public works.

An ill-advised publicity committee, or one paid in proportion to the work done each month, and liable to dislodge if the work were slackened, would have been a wise investment. Dr. Bryce said his idea had nothing to do with the recent decision of Dr. Turiff from the Board. He was not investigating that matter. There is no truth in the report that he left the Board. The reason of his resignation is here to investigate.

Medical Officer Miss Halifax. Halifax, March 24.—G. H. Hallinan, medical officer of the Interior Department, arrived in the city yesterday, on his annual inspection tour. He had nothing to do with the recent decision of Dr. Turiff from the Board. He was not investigating that matter. There is no truth in the report that he left the Board. The reason of his resignation is here to investigate.

THE SIGNS OF THE TIMES. Daily the columns of the press remind us that spring is approaching and preparations are already being

made for the busiest summer in the history of Central Canada. One day last week one thousand United States citizens with their families crossed the border to make homes in this country. A Winnipeg grain estimator says that the wheat crop will be in the ground early next month. The C.P.R. announces that the seed and grain crop will be harvested on the C. & E. N. W. line by the G.T.P. bridge at Saskatoon. Work is being started on the Battle River bridge, and contractors now in Edmonton estimate that 2,000 men will be employed on G.T.P. work. The grain crop will be harvested with great general application. It is indeed difficult to clearly narrow the work done by the Board and the opportunity now open to it. To detail the work done in figures and words is impracticable and to outline the general scope of the work is equally so. Nor is it necessary.

The public are very well apprised both of the work done and of the work which can be done and are quite willing to hear a large share of the same.

AN UNPLUSED GIDEON. The Montreal Star advises Mr. Birchenough by example of Gladson to dispense with the services of Mr. Foster, Mr. Farnham, Mr. Birchenough, and Colonel Sam Hughes. Creditting the Star with a sincere desire to free its party from the wreckers, and admitting that the wedding was to be entirely and unquestionably wholesome, it must still be remembered that the Star has been a leader in the cause of temperance. A letter to use his name in connection with this and other transactions, and another to him from Mr. Fraser, having received instructions from the Pulp company to submit a bill to him on his own behalf, will surely be held to be of his own making. The Star's editor, however, includes among others, his own father-in-law, originally a member of the Pulp company, and it is to be hoped that he will be good form, consequently, to submit it.

Mr. Birchenough, invited the witness to explain the circumstances that his principal agent, and his clients' agent, had been asked to pay him off.

Mr. Birchenough pointed out that the figures \$7,000 were in different kinds to that of the body of the Pulp company, from which it was sought to show that the amount was incurred by the last named, and not by himself, and may have been submitted.

"On looking at the figures," said Mr. Fraser, "I find that they are in fact correct, and they are mine."

"Inverted at the time?" queried Mr. Birchenough.

"No. It is a common practice to make out the tender and to get rid of them in two different ways. The Star might at least have hinted to the reader that the writer of the letter might be situated.

This issuing, it will be feared, will have to be left to the writer, who is sure to stay appear in a fitting humor to undertake the task. Perhaps Mr. Birchenough, on this occasion, will be able to let the underwriter understand through it could be said he had shown his strong desire to be rid of their company.

A PANIC IN A SCHOOL.

Silican Children Injured During a Fire.

Katowice, Prussian Silesia, Mar. 24.—During a fire in a school in this city this afternoon, seven children, the youngest of whom was 10 years old, were severely burned. The children, who had been playing in the school yard, were left to go home, and to stay in the room where the fire had been. The signal for the fire was given, and out one of the exits, but the children, with the warning, "With the warning, start to run," did not run, but stopped, and then their teacher, project barred. The children behind the door, who did not know what had happened, ran directly upon them ahead of them that they condemned the door. The teacher, who had the project, was severely injured.

The teacher would have been more serious had not some persons, who had been present, got the doors open and put an end to the panic.

The teacher, who had been sent to guard the railway, are William Whyte, second vice-president of the Canadian Pacific, Mr. James of the C.N.R., and David Peterman, manager of the Intercolonial.

Any of these men will be pleased to receive a copy of the report of the investigation, which will always be ready to advocate railroads' interests.

Mr. Fraser explained that there were procedural reasons. It was thought possible, in some cases, that the information might leak out through some clerks or other official of the bank. When the inquiry was completed, it was quite natural for them to make up the sum by their individual check, and to add it to the total.

The manager had asked for Mr. Turiff and toed him a power of attorney but, as far as he was concerned, he had never acted for him again since 1887.

Mr. Turiff being anxious to be called in, he had nothing to do with the recent decision of Dr. Turiff from the Board.

Whether they wish him to be called or not, Mr. Turiff will make a statement on such a future meeting.

MR. AMES TIMBER LIMIT SCANDALS

March 25, 1908.

The investigation of the sale of timber limits was continuing here this morning. One day last week one thousand United States citizens with their families crossed the border to make homes in this country. A Winnipeg grain estimator says that the wheat crop will be in the ground early next month.

The C.P.R. announces that the seed and grain crop will be harvested on the C. & E. N. W. line by the G.T.P. bridge at Saskatoon. Work is being started on the Battle River bridge, and contractors now in Edmonton estimate that 2,000 men will be employed on G.T.P. work.

PELA FOR A CITY MARKET.

Editor Bulletin.

Some have been wondering why vegetables are so dear in Edmonton. Living in a rural community, the garden gardener, who has his cellar and root cellar, can grow his own vegetables, and eat them in the winter, and save on his grocery bill.

The market gardener, who has no cellar, and no root cellar, and no garden, will have to buy his vegetables, and pay a high price for them.

FOR A CITY MARKET.

Editor Bulletin.

Some have been wondering why vegetables are so dear in Edmonton. Living in a rural community, the garden gardener, who has his cellar and root cellar, can grow his own vegetables, and eat them in the winter, and save on his grocery bill.
